

As one of many DJs for my local LPFM station (KRRC) my opinion may be biased, but LPFM is the only true community radio. LPFM radio gives every voice in the community the ability to be heard. It provides a public forum where local issues can be discussed in a way that national radio never can. Only on LPFM radio will topics of strictly local importance find a platform from which they can be brought to the people. In this time when so much importance is put on building our communities we should embrace and expand LPFM radio so all people can have a voice and live their first amendment rights. The expansion of LPFM will be one step towards the strong communities we hope to build for the future.
